

DAVID LEE

Thank you for your purchase.

This furniture was recently built and finished exclusively for you.

There may be a stain/paint odor that will dissipate in time.

Our product is designed to imitate the look of an antique.

Rubbing, antiquing, and distressing (consisting of worm holes, peeled paint, nicks and scratches) are all part of this look and were intentionally applied to this product.

Whether ordered with standard or light distressing, eventual crackling, shrinking, non-threatening cracks, visible knots, grain variances and yellowing are acceptable end results of our finishing process. Construction joints and seams and imperfections in the wood may be visible.

This is normal and is considered part of our antiqued finish.

(SEE REVERSE FOR CARE INSTRUCTIONS.)

DAVID LEE

CARE INSTRUCTIONS

As with all wood furniture, our furniture should not be exposed to moisture, humidity or heat, as this may damage the finish. Placemats and coasters should be used under all dinnerware and glassware, and the furniture should only be cleaned with a furniture polish or wax and a soft cloth. If necessary, wipe lightly with a damp cloth and mild detergent, and then thoroughly dry the surface.

Do not use any cleaning products that contain ammonia.

For finishes that have been worn due to heavy usage, you may carefully apply a furniture paste wax to once again bring out the soft sheen. This paste wax may be purchased at most hardware stores and should be applied only when necessary, and not more than once a year, by following the instructions on the container.

With proper care, your purchase will bring many years of enjoyment.
